

SMALL BUSINESS MANUFACTURERS OUTREACH EVENT

Presented by: Air Force Materiel Command (AFMC), Army Tank-Automotive & Armaments Life Cycle Management Command (TACOM LCMC), Defense Logistics Agency (DLA) Land and Maritime

Learn how your manufacturing and re-engineering capabilities may fit into the supply chains of three Department of Defense (DoD) agencies.

- AFMC conducts research, development, test and evaluation, and provides acquisition management services and logistics support necessary to keep Air Force weapon systems ready for war.
- As a major subordinate command of Army Materiel Command, TACOM manages the Army's ground and support systems materiel enterprise and the Army's related organic industrial capabilities.
- DLA Land and Maritime manages the supply chain for ground-based and maritime weapons systems repair parts, small arms parts and fluid-handling systems.

Morning presentations will address topics such as diminishing manufacturing sources and material shortages (DMS/MS), the source approval process, use of other transaction authority and the Small Business Innovative Research/Small Business Technology Transfer (SBIR/STTR) Program related to manufacturing. Breakout sessions and one-on-one meeting opportunities will be available in the afternoon. Engage with agency representatives and DoD prime contractors, as well as partner organizations such as the Procurement Technical Assistance Program (PTAP), the Small Business Administration (SBA) and a Small Business Development Center (SBDC).

Tuesday, July 10, 2018, 8:00 AM to 4:00 PM
University of Toledo Nitschke Auditorium
1510 N Westwood Ave., Toledo, OH

No cost to attend, but space is limited
and registration is required for all participants.
