Join the Ohio University PTAC at Cleveland, the Cleveland District SBA and the SBIR experts at the Ohio Aerospace Institute as we discover the opportunities that exist for small businesses with the SBIR/STTR program.

This webinar is designed to explain how these programs help small companies develop unproven innovations with great commercialization potential and broad impact.

SBIR grant opportunities are coming up from agencies such as:

- Department of Agriculture
- National Institutes of Health
- National Science Foundation
- U.S. Air Force
- U.S. Navy

This procurement technical assistance center is funded in part through a cooperative agreement with the Defense Logistics Agency.
